Product Backlog:
- As an active person, I want to be able to see my progression in a bar graph or line graph from the start to the end of a duration
- As a user, I want to be able to increase the quantity of a meal from a single API
- As a user, I want to be able to see other people's plans to get and idea of what I should set my schedule like
- As a user, I want the userProfile page to match in theme with the rest of the app for stylistic reasons.
- As a user, I want to have a better UI on the calendar to help match the theme of the app better
- As a gym rat, I want to make sure I reach my calorie amount better by having a tracker of how many calories I consumed
- As a user, I would like to have some sort of motivation when I complete my workouts or eat a certain nutrition amount(i.e. achievements platform)
- As a user, I want to see more suggestions about the certain food that we should eat.
- As a user, I want to add a photo on my profile page.
- As a website user, I want the app to be deployed so I can be able to access this page anywhere.
